

➤ Go to pos config and tab order

➤ 2 buttons booking and booked order active now

- Create booking order and input information booking

The screenshot displays a POS system interface. On the left, a list of items is shown: '1.000 Unit(s) at \$ 800.40 / Unit(s)' and '2. [DESK0005] Customizable Desk (Custom, White) \$ 750.00'. Below this, a 'Customer points summary' table is visible:

Customer points summary:	
Client point	0
Redeem	0
Remaining	0
Plus	1550
Next point	1550

Below the table, there are fields for 'Note:' and 'Signature:'. At the bottom left, a 'PAYMENT' button is highlighted. To its right is a numeric keypad with buttons for digits 1-9, 0, '+/-' and symbols for quantity (Qty), discount (Disc), price (Price), and a trash icon.

On the right side, a modal window titled 'Please input delivery information' is open. It contains the following fields:

- AMOUNT TOTAL:** \$ 1,550.40
- PHONE (*):** (870)-931-0505
- DELIVERY ADDRESS (*):** 3404 Edgewood Road, 72401 Jonesboro, Un
- DELIVERY DATE:** (empty)
- NOTES:** (empty)
- SIGNATURE (*):** (blue box with a signature line)
- PRICELIST (*):** Public Pricelist
- PAYMENT PARTIAL AMOUNT:** (empty)

- When customers come back your shop, cashiers can click to button Booked order and find order
